# **INTRODUCTION**

## **WHY QUALITY MATTERS?**

## OUR BELIEF

The data generated by shifting our digital media from traditional buying methods over to programmatic trading would help Colgate create our own inventory quality definitions and value benchmarks

# WHY WE NEEDED A QUALITY METRIC

We wanted to overcome common barriers in media buying that limit our understanding of quality and establish:

**THE EFFECTIVENESS  
OF INVENTORY TYPES  
AND SOURCES,  
SEPARATE FROM  
CREATIVE AND/OR  
TARGETING  
VARIABLES**

**CONTEXT AROUND  
VIEWABILITY VS.  
MEASURABILITY WHEN  
IT COMES TO 'WASTE'.  
HIGH VIEWABILITY DOES  
NOT AUTOMATICALLY  
MEAN HIGH QUALITY**

**TRUE CROSS  
CHANNEL FREQUENCY  
AND NEGATIVE  
IMPACT FROM  
OVER DELIVERY**

# THE BUSINESS QUESTIONS WE SET OUT TO ADDRESS

01

Can we define a customizable quality metric to measure programmatic media cost and impact?

02

Can we establish market level benchmarks and can we build a scalable reporting infrastructure across 80+ markets & DSPs?

03

Can we create custom bidding algorithms to optimizing programmatic media buying towards quality?
